Economics allows us to find patterns within every aspect of our world – whether it’s populations of animals, hospitalisation rates, supply chains, transport, air quality – you name it. By identifying these patterns, students can innovate ways to disrupt the status quo and maximise, or shift, outcomes and efficiencies on whatever topic they’re passionate about... and working on your passion is never boring!

MYTH:
Economics is boring

Because of its versatility, economics makes a great pairing with all sorts of programs to complement your studies and develop you into a social scientist and thereby more well-rounded.

UQ students can double their skills and knowledge by combining their economics program with a dual degree in business management, commerce, law, engineering, arts, science and more.

FALSE.
A huge number of today’s economists care about principles of equality, dignity and respect. Of course, in the finance sector an economist’s work can sometimes mean maximising profit, but in many circumstances, it’s about finding solutions for poorly designed programs, policies and issues of access.

“No. Absolutely not. I’m not very good at math and I don’t like math, but here I am, at the end of my program and I’ve managed to go through the second half of my economics subjects barely touching it – very strategically.”
Lachlan
Bachelor of Politics, Philosophy and Economics
Honours graduate

Think scholarships aren’t for you? Think again.
UQ offers a range of scholarships for all kinds of reasons. Before you apply to study at UQ, be sure to see what undergraduate economics scholarships are on offer: scholarships.uq.edu.au

Explore more potential pathways and discover our alumni thriving in industry today.

“Think again. The thing about learning economics was not about the piece of paper I received at the end of my degree. It was about learning something you can use in every aspect of your life, whether you become an economist or not – I wish it was compulsory for everyone!”
Effie Zahos
Bachelor of Economics graduate

Developing Indigenous economists

Each year, the UQ School of Economics offers scholarships for Aboriginal and Torres Strait Islander students for every level of study (bachelor’s, masters, PhD) which can be combined with other UQ opportunities to boost income support.

“The lack of Indigenous perspective in economics is deeply problematic and a barrier we must overcome if we wish to create real and lasting change.”
Professor Daniel Zizzo
Head of School
School of Economics
